25X1A

1951 PRICE SUPPORT PLAN FOR THE METALLURGICAL INDUSTRY ( 6pp; German; [ ] )

25X1C

25X1X

25X1A

This 6-page document is a typewritten copy, in tabular form, of the 1951 price support plan for the metallurgical industry. The plan was issued [ ] by the Department of Finances and Operations of the Ministry for Heavy Industry in Berlin.

25X1C

The four columns of figures are headed as follows: 1951 production quota (in tons); amount of subsidy per unit (in Deutsche marks); total subsidies per individual item (in 1,000 Deutsche marks); total subsidies per enterprise or VVB (Federation of People-Owned Enterprises) in 1,000 Deutsche marks.

On the left margin are listed the GDR metallurgical plants such as Mansfeld, Riesa, Hennigsdorf, Brandenburg, Maxhütte, etc. and the products on which they are granted subsidies. The products are typical of the enterprises - sheet, strip, bars, pipes, wire, etc.

From the figures contained in this table it is not possible to determine the cost prices of the individual products since the sales prices are not indicated. (Sales price plus subsidy equals cost price.) However, the 1951 production quota for these reparations and/or export products is indicated.

Total subsidies for the metallurgical industry amount to 222,983,700 Deutsche marks.
